

## Summer School 2021

Our 3 day Summer School ran on 31st August 2021, 1st September 2021 & 3rd September 2021.

The aim of our Summer School was to:

- assist in the recovery of missed learning and development
- offer opportunities to enhance physical health, mental health and well-being
- offer opportunities to forge relationships with new teachers and friends
- offer the opportunity for pupils to familiarise themselves with their new environment

**The three-day programme was a blend of academic learning and enrichment activities.**

The plan was to equip new members to the Harrow Way family with the skills and knowledge to start Year 7 as happy and confident students, ready to learn, aware of how to seek help if needed and already having a group of friends they have built relationships with.

The three days enabled the students to familiarise themselves with the school and build confidence, friendships and personal skills they will need through their time at Harrow Way.

We used an organisation called 'Wise up Team Building.' The team building activity days are the perfect way of helping students break the ice. They work together on challenges and learn valuable lessons which help them prepare for the start of term.
