

# **Year 7 Knowledge Organiser**

**Spring Term** 

# **How do I complete Knowledge Organiser Homework?**

HWCS

Link to self-quiz video: <a href="https://youtu.be/cFUuhtPIMPU">https://youtu.be/cFUuhtPIMPU</a>

# Step 1

Check on:

ShowMyHomework for what words / definitions / facts you have been asked to learn.

# Step 2

Write today's date and the title from your Knowledge Organiser in your self-quizzing book.

# Step 3

Read the section of the Knowledge Organiser that you are studying. Read it slowly, you can read it aloud and with a ruler if this helps.

# Step 4

Cover up the section and try to write out the information exactly as it is written on the Knowledge Organiser in your selfquizzing book.

DO NOT PEEK!

# Step 5

Uncover the section and compare it to what you have written. If you have made mistakes or missed parts out, add them in using a pencil or a different colour.

# Step 6

Repeat steps 3-5 again until you are confident.

You will need to bring your self-quizzing book in every day and your teacher will check your work.

You will be tested in class.

## **Art - Cubism**

#### **STILL LIFE**

A painting or drawing of an arrangement of objects, typically including fruit, flowers and other inanimate objects.

https://wiki.kidzsearch.com/wiki/Still life

3.

Genre focus

**Cubism** A revolutionary style of modern art developed by Pablo Picasso and Georges Braques in 1907. It aims to show all the possible viewpoints of a person or an object all at once. It is called Cubism because the items represented in the artworks look like they are made out of cubes and other geometrical shapes. The Cubists challenged conventional forms of representation, such as perspective, which had been the rule since the Italian Renaissance. Their aim was to develop a new way of seeing which reflected the modern age.

## **Literacy focus**

Cubism 2. Still Life Texture Relief Still life 2D 3D Subject Background Midground Foreground Shape Primary colour Secondary colour Monochromatic colour scheme Collage

# **Year 7 Project 2** Still life + Cubism

#### **Artist focus**

#### **Pablo Picasso**

Picasso was born in Malaga in Spain in 1881. Even as a child he was better at drawing than many adults. He could draw and paint just about anything, and in any style. He liked to experiment and try out new ideas, which is important if you are an artist, because the world is always changing. In 1904 when he was 23 he moved to Paris. This is because Paris was the capital of the avant-garde, which means cutting-edge and very cool. Picasso became friends with lots of artists and writers, like Georges Braque (who he invented cubism with) and a writer called Gertrude Stein (who collected art + wrote a cubist book). He became interested in art from other continents too. Pablo Picasso is one of the most famous artists of the twentieth-century because he helped us to see the world in new ways

https://www.coolkidfacts.com/pablo-picasso/

6.

## **Art - Colour**

# **COLOUR**

Colour plays a vitally important role in the world in which we live. Colour can sway thinking, change actions, and cause reactions. It can irritate or soothe your eyes, raise your blood pressure or suppress your appetite. As a powerful form of communication, colour is irreplaceable.

# COLOUR WHEEL

## ADJECTIVES TO DESCRIBE COLOURS

Light Bright Vivid Glowing Vibrant Brilliant Intense Dazzling Subdued Diluted Gloomy Depressing Pale Dull Murky Muted Monotonous Fluorescent Saturated Opaque Transparent

#### **COLOUR SCHEMES**

6

#### **PRIMARY**

Uses the primary colours: Red, Yellow & Blue. They can not be made by mixing other colours.

#### **COMPLEMENTARY**

Uses a pair of colours that are opposite each other on the colour wheel. The pairs are: Green/Red; Blue/Orange; Yellow/Purple.

#### **SECONDARY**

Uses the secondary colours: Orange, Green & Purple. Each secondary colour is made by mixing two primary colours.

#### **HARMONIOUS**

Uses three or four colours (primary, secondary and tertiary) that are next to each other on the colour wheel.

#### **TERTIARY**

Uses the tertiary colours. They are made by mixing a primary and a secondary colour next to each other on the colour wheel.

#### **MONOCHROMATIC**

Uses Tints, Tones & Shades of one colour. The word MONO means ONE and the word CHROMA means INTENSITY OF COLOUR.

# **Art - Drawing**

# DRAWING The basic craft of drawing is about two things: 1. To control your hand and 2. Learn to see.

## **Art - Formal Elements**

# FORMAL ELEMENTS

The Formal Elements are: line, shape, form, tone, texture, pattern and colour. They are used

is a symbol or shape that is repeated. A design that is created by repeating lines, shapes, tones or colours. The design used to create a pattern is often referred to as a **motif**. Motifs can be simple shapes or complex arrangements. Tessellating any image creates a Repetitive pattern.

## LINE

is the path left by a moving point, i.e. a pencil or a brush.

A line can take many forms. It can be horizontal, diagonal or curved. Line can be used to show: contours (the shape and form of something); movements, feelings

It could be just an outline or it could be shaded in. When drawing shapes, you must consider the size and position as well as the shape of the area around it. The space between the shapes is called **negative space**.

# 6 FORM

**is a three dimensional shape (3D)**, such as a cube, sphere or cylinder. Sculpture and 3D

is the lightness or darkness of an object. This could be a shade or how dark or light a colour appears. Tones are created by the way light falls on a 3D object. In every 3D object there are minimum of 3 tones; light, mid-tone and dark. Tone can be flat or it can vary from dark to light.

is the surface quality of something, the way something feels or looks like it feels. Actual texture really exists, so you can feel it or touch it.

Visual texture is created using marks to represent actual texture. It gives the illusion of a texture or surface. You can create visual texture by using different lines, shapes, colours or tones.

5

4

3

2

SCALE

is the size of one object in relation to the other objects in a design

9

10 **PROPORTION** refers to

the relationship of the sizes of two or more subjects or elements.

# **Art - Painting**

PAINTING 1. The act of painting, using a brush, palette knife, sponge, or airbrush to apply the paint; 2. The result of the action – the actual picture.

#### 1 Watercolour brushes:

Are specially made to allow the artist to control the flow of the colour from the brush onto the paper. A watercolour brush should hold a fine point when wet and spring back into shape after each stroke. It should carry the colour allowing the artist to: a) lay it down on the paper evenly 2) consistency.

#### 2 WATERCOLOUR:

a) Paints that are made of pigments suspended in a water-based solution (binder).

b) The art of painting with watercolours, especially using a technique of producing paler colours by diluting rather than by adding white.

#### WATERCOLOUR PAPER:

Best watercolour papers are made from cotton fibres. There are three types of w/c paper.

HP- Hot Press. Smooth surface for detailed work CP (NOT) - Cold press. Slightly textured for most types of work Rough - Heavily textured paper enhances the final piece of work.

#### 3 WATERCOLOUR TECHNIQUES:

- a) Wash: When watercolour mixture is gradually diluted with water.
- b) Blending: When two colours seamlessly merge into one another.
- c) Wet-on Wet: Water is applied onto the paper and then paint is applied onto it.

#### d) Masking Fluid

It is a rubber type product that prevents the paint from reaching the paper and is peeled off to expose the whitepaper left untouched.

#### 4 ROUND BRUSHES:

Good for sketching, outlining, detailed work, controlled washes, filling in small areas.

FLAT BRUSHES: Good for bold strokes, washes, filling wide spaces, impasto. Edge can be used for fine lines, straight edges and stripes.

#### ACRYLIC PAINTING SURFACES:

Canvas, paper, wood, or anything which is neither greasy nor too glossy.

A good selection of round and flat stiff synthetic brushes. Palette knives.

#### 6 ACRYLIC PAINTINGS TECHNIQUES: UNDERPAINTING: A layer of paint applied first to a canvas or board.

a) Tonal Grounds Under Painting

This type of painting has the entire canvas covered in a single transparent colour. This layer will create backlighting shadows that will tone the entire painting and provide contrast.

b) A Tonal Under-Painting A layer of paint applied first that acts as a foundation for the painting with some built in contrast and tonal values.

IMPASTO: A technique used in painting. where paint is laid on in very thick layers that the brush or palette-knife strokes are visible. Paint can also be mixed right on the canvas. When dry, impasto provides texture; the paint appears to be coming out of the canvas.

7 POSTERPAINT:

A semi-opaque paint with a water-soluble binder, used mainly in schools.

8 OIL PAINTS: is a type of slowdrying paint that consists of pigment = = suspended in a drying oil, commonly linseed oil. Not used in schools.

#### 9 MIXED MEDIA:

A Technique that uses more than one medium or material. Assemblages and collages are two common examples of art using different media that will make use of different materials including cloth, paper, wood and found objects.

#### ASSEMBLAGE:

The making of 3D art, often involves using found objects.

#### MIXED MEDIA COLLAGE:

This is an art form which involves combining different materials with paint to create a whole New artwork.

### 10 SGRAFFITO TECHNIQUE:

Used in painting, pottery, and glass. Consists of putting down a preliminary surface, covering it with another, and then scratching the top layer. The pattern or shape that emerges is of the colour below.

# **Art - Photo + Critique**

# 1. Types of Photography

#### **Landscape**

- **-Shows space** within the world- think 'land' to remember, but can include sea
- -Can make use of water for reflections
- -Often symmetrical
- -Usually **all in focus**

Still Life
-Inanimate objects
-Simple background

such as fabrics, wood & plain surfaces

-lighting usually from the side, usually natural

**Portraiture** 

-Photo of a person or a group of people -Plain background

- -Plain background -Face fills the frame
- -Focus usually on the eyes
- -Controlled lighting
- -Can be posed or natural

## 2. How to use the camera

#### **Portrait mode**

Camera needs to be this way up to take a portrait photograph

#### **Shutter**

The large round button.
Hold half way down to
focus, listen for the beep,
then hold all the way down
to take.

On/off button

Strap ALWAYS on wrist

# 3. Tips

- -Do not use flash (especially indoors)
- -Make sure your lighting is even
- -Be still when you take your photograph to avoid camera shake
- -Make sure your image is focused before you take it
- -Use **simple backgrounds**; plain walls
  - work well
- -Get closer. **DO NOT use zoom**
- -Don't rush
- -Take more than one photo

Critiquing artwork
You need a specific
vocabulary to comment
on all the elements of art.
Here are some to get you
started.

#### Colour

Colour is very important. No matter what type of artwork colour helps define the piece and the artist. A lot of artwork can be determined on who did the work just by looking at the colours.

- Bold
- Vibrant
- Subtle
- Pale
- Earthy
- Naturalistic
- Harmonious
- Complementary

#### Shape

Art comes in various shapes whether it is a painting or a sculpture. All will contain shapes.

- Organic
- Curvaceous
- Geometric
- Angular
- Elongated

#### Texture

Texture can be actual (it exists) or visual (made to look like it exists). It is often used when referring to clothing, furniture and hair.

- Rough
- Fine
- Smooth
- Coarse
- Uneven

#### Movement

Movement is seen in every piece of art. Movement helps to create or define a piece of art.

- Swirling
- Flowing
- Dramatic
- Still

#### Tone

This will describe the light and dark areas in a piece of art.

- Subtle
- Contrasting
- Muted
- Dramatic

#### Contrast

This relates to the differences of the elements in an artwork.

- Dramatic
- Subtle
- Strong

#### Scale

This relates to the size of the work and the size of the objects in relation to each other.

- Large
- Small
- Intimate
- Miniature
- Monumental
- Distorted

#### Line

Line is art is similar to how a musician follows lines and creates expression using notes played for different lengths of time.

- Flowing
- Delicate
- Simple
- Bold
- Thick
- Thin

# **Art - Textiles and Clay**

# **TEXTILES**

# **Key Stage 3**

# **CLAY MAKING**

#### 1.SEWING MACHINE

A machine with a mechanically driven needle for sewing or stitching cloth.

Ziggag stitch www. Three-step zigzeg stitch VANAAAA Lightning bolt stitch www Straight stretch stitch

#### 2. HEAT PRESS

A machine which uses heat and pressure, to transfer a design or a graphic on another surface, and to heat and fuse man-made materials.

#### 3. BATIK

A method (originally used in Java) of producing coloured designs on textiles by dyeing them, having first applied wax to the parts to be left undyed.

#### 4. TAKE CARE

#### **Electrical equipment**

Tuck in ties Tie hair back No water near equipment Be aware of sharp/hot objects Electrical machines, take care with wires

Do not use ANY equipment before training

#### Handstitching

Needles/Pins - Use a pin cushion Pick fabric scraps off the floor Scissors – pass safely

#### Clay

No eating/drinking whilst using clay ALL equipment to be wiped with damp cloth Wear an apron Pass knives safely Clear clay from floor

#### 5. Couching

#### **Applique**

#### Stitching by hand

#### 6. Clay Equipment + Process

Fire = method of heating clay **Kiln** = oven in which clay is fired **Bisque ware** = clay that has been fired to 1000oC Greenware = clay that has not been fired Board, guide sticks, rolling pin for rolling out clay to an even level **Tools** = for joining Slip = clay glue Knives = for cutting only

#### 7. Greenware

Pinch pot

Coil pot

**Bisqueware** 

Slab building

Glazing

# **Dance**

# Year 7 - Dance

Performing skills

Term	Definition
Timing	moving to the beat of the music and/or your group.
Energy	performing actions with the full amount of effort required.
Movement memory	remembering all of the movements.
Accuracy	making the correct shapes with your body.
Facial expressions	showing the mood of the dance through your face.
Extensions	Fully extending the legs, toes, arms and fingertips
Focus	being fully committed to the performance by ignoring distractions.
Flexibility	being able to perform a wide range of movements with ease.

Warm up

Leadership

Audience

**Impact** 

Re-cap

Reflection

Choreography skills

Term	Definition
Actions	the dance movements.
Levels	the different heights the dancer reaches whilst performing.
Formations	the positions or shape that the dancers stand in.
Directions	the direction of travel or the way that the dancers are facing.
Transitions	linking one movement to another.
Dynamics	how the actions are performed.
Unison	same movements at the same time.
Canon	same movements performed one after another.

Tier 3 vocabulary

Sequence

Choreography

Rehearsal

Venue

Styles

**Street dance** often uses energetic and sharp movements whilst maintaining a low centre of gravity.

**Contemporary** is an expressive style of dance which often uses floor work, lifts, contractions and falls.

Genre

**Narrative dance** tells a story and has characters.

**Abstract dance** places importance on the movement rather than portraying a storyline.

# **D&T - Steady Hand Game 1**

# HWCS

## Year 7 Design and Technology Knowledge Organiser Steady Hand Game

#### **Computer-aided design (CAD)**

Computer-aided design (CAD) is about using computers to assist you, the designer, during the design process. It can help in a number of ways, for example you can produce a design in a variety of materials and you can rotate a design through 360 degrees on any axis. The designs can be manipulated and mirrored with a simple click of the mouse. Any area of a design can be viewed at a rangeof magnifications.

#### **Examples of 2D and 3d CAD software**

2D CAD soft ware such as Techsoft 2d design can be used to design products such as packaging nets or panels for products. These can then be printed out or laser cut, then made into products.

3D CAD software such as Onshape or Tinkercad can be used to make 3d models of products. These can then be used as engineering drawings or made using 3d printers.

#### Input, process and output. Circuit components

A system is a group of parts that work together to carry out a function. Almost all products that contain electronics and mechanical parts are systems. If you understand the blocks that make up a system and how these interact with each other, you will be able to design complex products quickly and easily.

# Parts of a system

The simplest system has three systems blocks:

- The input block detects a signal from outside the system. For example, it could be a switch that detects movement or a sensor that detects light.
- The process block receives the signal from the input block and determines what the system will do. There are many different types of process block.
- The output block is turned on or off by the process block. Common output blocks produce light, movement or sound.

The systems blocks represent physical items – they might be individual components or groups of parts working as a sub-system. For example, the output block for an alarm could be a siren sub-system. The systems diagram for the alarm would include this sub-system as a single output block.

# **D&T - Steady Hand Game 2**

## Year 7 Design and Technology Knowledge Organiser Steady Hand Game

#### **Soldering**

**Soldering** a process in which two or more items are joined together by melting and putting a filler metal (solder) into the joint, the filler metal having a lower melting point than the adjoining metal. Unlike welding, soldering does not involve melting the work pieces.

#### Method of soldering

The diagram below shows the correct steps you need to perform to solder an component into place

#### **Soldering defects**

The diagram below show the comment defects that can happen when you are soldering.

#### <u>Polymers</u>

Approximately 5 million tonnes of polymer are used in the UK each year, according to government figures. This equates to approximately 1.5 kg per person per week. It is estimated that between 50 and 60 per cent of this is used only once before disposal.

#### Types of polymer

Thermoforming	Thermoforming plastics are a group of plastics that can be heated and formed into a shape. This type of polymer can be heated and formed more than once
Thermosetting	Thermosetting plastics are a group of polymer can be heated, and then set into shape. These polymers can only be heated and set once.

#### ▼ Some common thermoplastic polymers

Туре	Properties	Typical uses
PMMA (poly(methyl methacrylate))	Known by the trade names Acrylic and Parspex Can be transparent Hard weering and tough Softens between 85°C and 166°C	Plastic windows, bath tubs
HDPE (high-density polyethylene)	Strong and stiff Softens at about 130°C	Pipes, buckets, bowls
PET (p-olyethylene terephthalate)	High strength and good toughness Heat resistant Softens at about 80°C	Drinks bottles, food peckaging
HIPS (high-impact polystyrene)	Reasonable strength and good toughness Softens at about 90°C	Packaging
PLA (polylactic acid)	Reasonable strength but can be brittle Softens between 70°C and 80°C	3D printing, children's toys

# **D&T - Door Stop 1**

## Year 7 Design and Technology TEXTILES / DOOR STOP Knowledge Organiser

#### Fibres —Natural and Synthetic

#### How textiles are made

Textile fabrics are made from fibres. Fibres are very fine, hair-like structures that are spun or twisted into yarns. These yarns are then woven or knitted together to create fabrics. Different fibres can be mixed together to create improved fabrics.

There are two main types of fibre:

- Natural fibres come from plants and animals.
- Synthetic fibres (manufactured fibres) come from oil, coal or petrochemicals.

The cotton boll (green pod) contains the plant seeds. The cotton fibre is found inside the boll, protecting the seeds.

#### ▼ Some common fibres

Туре	Source	Properties	Uses
Cotton	Natural - cotton plant	Absorbent; strong; cool to wear; washable; flammable	Clothing; soft furnishings; bed sheets; sewing threads
Linen	Natural - flax plant	Absorbent; hard wearing; cool to wear; washable; flammable	Summer clothing, soft furnishings, table linen
Silk	Natural - silkworm	Absorbent; natural shine; comfortable to wear	Luxury clothing and lingerie; knitwear; soft furnishings
Wool	Natural - animals such as sheep or llamas	Warm; absorbent; strong; low flammability; shrinks easily	Coats; jackets; jumpers; socks; blankets; carpets
Polyester	Synthetic - petroleum, coal	Strong, flame resistant but still melts; poor absorbency	Versatile; has many uses throughout textiles
Polyamide (nylon)	Synthetic - petrochemicals	Strong: melts as it burns; good elasticity (will stretch and recover)	Clothing; carpets; rugs; seat belts; ropes; tents
Acrylic	Synthetic - petroleum	Strong: burns and melts; good insulator	Knitwear; knitted fabrics; fake fur; upholstery

#### **Weaving and Knitting into Fabrics**

# Types of material and their uses

There are two main methods for making textile fabrics: weaving and knitting.

#### Weaving

Woven fabrics are produced on a loom using warp yarn and weft yarn. The warp yarn is stronger and runs vertically, while the weft yarn is woven over and under the warp yarn to create the fabric. The most common type of weave is called plain weave and has many uses throughout textiles. Different types of woven fabric are created by changing the way that the yarns are woven or the thicknesses and texture of the yarns, and through the use of colours.

Weaving is the strongest method of fabric construction and is ideal for products that need a firm structure, including school shirts, smart trousers, bedlinen, kites, holdalls and school bags.

#### Knitting

Knitted fabric is created by interlocking loops of yarn, which can be done either on a machine or by hand. The loops in the fabric trap air, making it warmer to wear, for example a knitted wool jumper will be comfortable and warm. Knitted fabrics can be stretched, but this can make them lose their shape.

There are two types of knitted fabric:

- Warp knitting uses several yarns that interlink vertically. These can be cut into shapes to make textile products.
- Weft knitting uses one yarn that runs horizontally. The fabric is built up row by row, with each loop interlocking with the row below. Hand knitting is done this way. This type of knitting will unravel if it is cut.

# D&T - Door Stop 2

# Year 7 Design and Technology TEXTILES / DOOR STOP Knowledge Organiser

#### **Setting up the Sewing Machine Step by Step**

#### Sewing machines

Most sewing machines have a variety of functions and stitches to complete the different processes that are needed to make a textile product. They have attachments, such as a special 'foot' for inserting a zip. Computerised sewing machines can be used to embroider original designs. An overlocker is a specialist machine that trims and sews the edge of the fabric at the same time. This is the neatest and most professional method of joining fabrics and neatening a seam or edge.

#### Health and Safety 15 rules of the workshop

#### Why do you think workshop Safety Rules are important?

If everyone follows workshop rules, everyone will be safe and learn how to use tools and equipment properly and efficiently.

Always **listen carefully t**o the teacher and follow instructions.

**Do not run** / rush in the workshop.

Know where the **emergency stop buttons** are positioned in the workshop.

Always wear an apron.

When attempting practical work, all stools should be put away.

Bags should be stored away, during practical sessions in the workshop.

Do not use a machine, if you have not been shown how to operate it safely, by your teacher.

Aways be patient, never rush practical work.

Always use guards, when operating machines.

Keep hands / hair and clothing away from moving/rotating parts of machinery.

Use hand tools carefully, keeping both hands behind the cutting edge.

Report any damage / faults to machines/equipment. Damage or a faulty part, could cause an accident.

Keep your workbench tidy. When you have finished with a tool / piece of equipment, return it to its storage cupboard / rack.

Never distract another pupil, when they are working on a machine or using tools / equipment.

Wear good strong shoes. Training shoes are not suitable.

#### **Tools and Equipment**

Tool	Image	Use
Coping Saw		Cut sheet material s to irregular shapes. This saw can cope with cutting curves.
Tenon Saw	IRWIN AS	Cut timber in a straight line.
Try Square		Use to mark out perpendicular waste lines ready for cutting accurate 90
Workbench Vice		For Holding and securing materials in place whilst cutting, shaping and forming.
Disc Sander		For fine finishing, removing waste material to the waste line.

## **D&T - Picture Frame 2**

# Year 7 Design and Technology Knowledge Organiser Picture Frame

#### **Timber Classificatioon**

#### **Hardwoods**

Hardwoods come from Deciduous trees. They loose their leaves each winter and are slower growing than softwoods. This makes for higher quality wood as the grain is closer (denser) together than softwood making it harder wearing. It is also harder to machine.

Examples, OAK BEECH ASH

#### Softwoods

Softwoods come from Coniferous trees. They keep their leaves all year round and take only 30 years to mature so are considered fast growing trees. Their grain is more open and so the wood is softer and less hardwearing than Hardwood. They are cheaper and easier to machine.

Examples, PINE SPRUCE CEDAR

#### Softwoods

Balsa

#### ▼ The properties and uses of selected softwoods

Off-white to tan colour

Soft - can be marked using a finger

Туре	Characteristic properties	Typical uses
Pine	Fairly strong, easy to work with Light brown or yellowish colour	Interior structures in buildings, furniture
Spruce	Strong and hard, but low resistance to decay Yellowish-white colour	Wooden aircraft frames

#### Sources of timber

Modelling

Timber is made from trees that are chapped down and then cut into planks in a sownill. The wood may be seesoned offer outling, which means that it is dried before use to remove molature. Seasoning makes wood lens likely to distort or wore.

Timber can be a renewable resource if grown in well-managed forests. Responsible management, includes planting new trees as older trees are cut down. Timber grown this way can be identified by the Forest Stawardship Council<sup>®</sup> (PSC®) 100% daim or label.

The Forest Stewardship Council symbol

# **D&T - Food Technology**

## **Knowledge Organiser – Year 7 Food Technology Fruits and Vegetables**

#### **Nutrients**

Carbohydrates give the body energy.

Protein provides growth and repair of cells.

Fats are needed for warmth, energy, hormone production and protection.

Vitamins and minerals help to maintain normal cell function and maintain general health.

#### Personal Hygiene

- Wash your hands before handling any food
- Put your hair up
- Wear a clean apron
- Use a blue plaster if you have a cut
- Don't cough or sneeze on the food

#### **Food Hygiene**

- Clean work surfaces
- Keep work area clean and tidy
- Keep raw and cooked foods apart to prevent cross contamination.
- Use a red chopping board for meat and a green board for fruit and vegetables
- · Wash up correctly
  - · Hot water, changed frequently
  - · Washing up liquid
  - Cloth for washing
  - · Clean tea towel for drying

How should you wash up at the end of each lesson?

Use a dish cloth and scourer in warm, soapy water to wash up all your equipment. Place it on a clean sink area and then use a tea towel to dry it up

The sink should be left clean and dry. No food scraps in the bottom of the sink.

Tea towel and dish cloth are placed in washing basket at the end of the lesson.

Term	Definition	
Characteristics	Three words that sum up your character's personality i.e. Proud, Powerful & Cruel or Shy, Nervous & Determined.	
Physicality	The way a character moves. This communicates their personality or mood.	
Facial Expression	The emotion or attitude on your character's face.	
Eye Line	Where are they looking?	
	e.g. Up = Proud or Arrogant. Straight Ahead = Determined or Honest. Down = Nervous or Shy. Side to Side = Shifty or Untrustworthy.	
Posture	The position of the body to communicate character.	
	e.g. Standing with a straight back = High Status or Pride. Slumped = Lazy or Tired. Hunched Over = Low Status or Low Self-confidence.	
Gesture	An expressive movement to show a feeling or characteristic.	
	e.g. Fiddling with fingers = nervous.  Punching fist into hand = aggressive.	
Walk	The way you walk can express your character.	
	e.g. Long strides = Confident. Small steps = Nervous. Walking in straight lines = Purpose and Determination. Walking in curves = Dreamy or Thoughtful.	

Design	
Proud, Powerful & Cruel. Or Shy, Nervous & Determined.	

Character

# Vocal Skills

Evaluation Skills

	ierm	Definition
Vocal Clarity How clearly the audience can hear your voice.		How clearly the audience can hear your voice.
	Vocal Expression	the different heights the dancer reaches whilst performing.
	Term	Definition
	Evaluation	Working out what was good about the performance and what could have been better.
	Strength	What was good about the performance.
	Weakness	What could have been better about the performance.

# When you make a comment about a strength or a weakness you must always do these three things:

- → Describe the strength/weakness.
- → Give an **example** of the strength/weakness.
- → Explain why it made the performance better/ worse.

# Drama 2

**Scripted Skills** 

**Format** Script

**Term** 

**Dress Rehearsal** 

**Definition** 

# Year 7 - Drama - Term 2

#### The things the characters do and say. **Script Dialogue** The words the characters say on stage. The things the characters **do** on stage. **Stage Directions** Casting Deciding which actor will play which character. Highlighting Highlighting your lines helps you find them quickly while you're rehearsing. Do not highlight your name or stage directions, only your Read Through Sit in a circle and read the play out loud, play-**Staging** Deciding how you will set up your stage. **Blocking** Deciding where you will stand on stage. Rehearsing Practicing how you will perform the scene.

Term	Definition	
Dialogue	Name: Dialogue, dialogue, dialogue.	
Stage Directions	Written in <i>italics</i> or (brackets).	
Stage Diagram	Draw a bird's eye view of your stage and draw arrows showing where everyone stands and moves.	

The final rehearsal before the performance. You treat this as if it were a performance - you

don't stop, you cover any mistake and you

Example Script
----------------

(A wood at night. Dave and Kelly enter from USL. Dave is struggling to carry a big, heavy looking backpack. Kelly is carrying an identical one and making it look easy.)

Dave: This bag is so heavy! I need a rest.

D.S

(He dumps his bag on the floor and sits down)

Kelly: Don't be such a wimp! Give it here.

(Kelly picks up the bag with ease and walks off USR)

Dave: Fine! Go! I'm staying here and

having a rest.

(In the bushes something growls)

Dave: Ummm... on second thoughts, wait for me!

(Dave jumps up and runs off after Kelly)

#### **IMPORTANT TERMS**

MORPHEME – A 'chunk' of a word that carries meaning. Morphemes are the smaller components that words are made of.

MORPHOLOGY – The study of how words are formed from smaller parts.

ETYMOLOGY – The study of where words come from and how they evolve over time.

PREFIX – A morpheme added to the beginning of a root word or morpheme to alter the meaning in some way.

SUFFIX – A morpheme added to the end of a root word or morpheme to alter it meaning in some way.

BOUND MORPHEME – A morpheme that cannot stand as a word on its own: it must be used in combination with another morpheme in order to form a word. Prefixes and suffixes are bound morphemes, as are most of the roots in the box to the right.

FREE MORPHEME – A morpheme that can stand as a word by itself, such as 'book'. While most of our bound morphemes come from Latin or Greek, many of our free morphemes can be traced to other ancient languages.

LATIN – An extinct language, spoken by the Romans, from which we get many of our morphemes.

GREEK – Another extinct language, older than Latin. We tend to see Greek morphemes in technical or scientific words.

ANGLO-SAXON – The language also known as Old English, spoken by the Germanic peoples who settled in England in the 5<sup>th</sup> century. This language evolved into the language we speak today.

DUAL VARIATION – A pair of synonyms (words with the same meaning) for which each of the two words can be traced back to a different language, e.g. bring/carry; buy/purchase; weird/strange; weep/cry.

# **HWCS**

Morphology

erm

Spring

#### **ROOT MORPHEMES - LATIN ORIGIN**

Root morphemes are 'chunks' of words that carry a certain 'flavour' of meaning. These roots appear in many different words, and they always signal the same meaning. If you can recognize the root in a word that you don't know, this will help you work out what the word means.

Root morpheme	Meaning
spect	to look/see
rupt	to break
port	to carry
struct	to build
grad/gress	to step
flec/flex	to bend
vert/vers	to turn
tract	to pull

#### **ROOT MORPHEMES - GREEK ORIGIN**

Root morpheme	Meaning
graph	write/draw
photo	light
phon	sound
morph	form/shape
chron	time

#### **PREFIXES - LATIN ORIGIN**

These are morphemes added to the **beginnings** of words in order to alter the meaning in some way.

Prefix	Meaning
de-	away/remove
dis-	apart/opposite
pre-	before
con-	with
inter-	between
intro-	inwards
ex/e-	out of
pro-	forwards
sub-	below
re-	back/again
trans-	across

#### **PREFIXES - GREEK ORIGIN**

These are morphemes added to the **beginnings** of words in order to alter the meaning in some way.

Prefix	Meaning
geo- bio-	relating to Earth
bio-	relating to life
tele-	far off/distant
anti-	against
auto-	self
mono-	one
poly-	many
, ,	·

#### PREFIXES - ANGLO-SAXON ORIGIN

These are morphemes added to the **beginnings** of words in order to alter the meaning in some way.

Prefix	Meaning
un-	opposite
mis-	bad/wrong
be-	to make/cause

# French - Core Language

#### **VERB INFINITIVES**

1-ETRE = to be

6- REGARDER = to watch

2- AVOIR = to have

3- FAIRE = to do

4- ALLER = to go

# Year 7 Geography Knowledge Organiser Term 3 : China

#### **Location of China Population Distribution Population Pyramids Rural-Urban Migration** Why are people migrating to urban areas in China? China is located in the Northern Hemisphere China is the world's most populous country, A population pyramid is a is a in the east of Asia. The capital city is Beijing with a population of around 1.428 billion. The graphical illustration that shows the and other large cities are Shanghai and population distribution of China is very distribution of various age groups in a Wuhan. Bordering countries include uneven mainly due to the physical population. Mongolia, Nepal, Tibet and India. The geography of the country. The eastern half of Yangtze River starts in Tibet and flows east China has a high population density mainly where it enters the East China Sea at because the land is fertile for arowing crops. A push factor is a reason to leave an area e.g. harsh climate, lac Shanghai and the country covers The west and the northwest has a low approximately 9.6 million square kilometres. population density due to mountains and deserts. The majority of the population lives in the east near Shanghai and north east near Beiiina. Speak Like a Geographer **Fieldwork Skills Impacts of Migration in China** Pollution (noise, water, waste, air, visual) Sustainability, Population, Choropleth Map: Nine out of ten of the world's most Advantages: Population density, Rural, Urban, polluted cities are in China. Visually effective - can see a large Rural-Urban Migration, Air pollution costs the Chinese economy amount of information and \$25bn a year in health costs Population pyramids, Pollution, general patterns Over half the concrete used in the world Social, Economic, Environmental, Disadvantages: last year was poured into China - this Map assumes the whole Choropleth Maps, Advanced threatens wildlife Geographical region/area has the same value, More than 70% of China's rivers and lakes Country (AC) enguiry were polluted from industry and untreated but there could be variations **Emerging Developing Country** sewage. Large parts of China's longest river, the Yangtze, have been irreversibly (EDC), Low Income Developing polluted. Country (LIDC), Limitation, Two million people had suffered diseases Reliability, Accuracy caused by drinking water with high arsenic content, including cancer.

# **Geography - Ecosystems**

# Year 7 Geography Knowledge Organiser Term 4 : Ecosystems

Biomes of the World	Types of Biomes	Coral Reefs	Threats to Coral Reefs
Biomes of the World  Onser Malania Superus farms Parameter Paramet	An ecosystem is a natural area in which plants, animals, and other organisms are linked to each other, and to the non-living elements of the environment.  A biome is a large scale ecosystem.  Each ecosystem is made up of biotic (living) and abiotic (non-living) elements.  Examples: Coral Reefs: Australia, Indonesia Tropical Grasslands: Ghana, Angola Hot Deserts: Egypt, Morocco, Libya Temperate Forests: UK, Japan	For coral to grow, there needs to be:  Warm water all year around with a mean temperature of 18°C.  The water needs to be clear and shallow.  The water cannot be deeper than 30 metres. Beyond this, there is not enough sunlight for photosynthesis.	Pollution from boats, walking on the reef, runoff from sunscreens and many other activities all damage the reef.  Corals cannot survive if the water temperature is too high.  Harmful tourists litter the reef and break pieces off to take home as a souvenir which kills the coral and the fish.  Destructive fishing methods like blast fishing or dynamite fishing damages the reef.
Responses to threats	Speak Like a Geographer	Fieldwork	Skills
There are five main gyres in the world's oceans. These trap plastic and rubbish and affect marine wildlife. Several attempts to reduce the amount of plastic in the ocean have been introduced.  1. A litre of light  2. The flip flop recycling company  3. The Plastiki	Biotic, Abiotic, Flora, Fauna, Climate Zones, Coral reefs, Coral Bleaching, Threats, Overfishing, Goods, Services, Waste	Evaluation  Geographical enquiry  Conclusions  Data presentation	How to draw a field sketch      Draw a frame to the size you want the sketch to be.     Lightly draw lines dividing the frame into four quarters. These will help you to draw the rest of the sketch, acting as guidelines. The lines can be erased when the sketch is complete.     Draw in the most important lines, such as rivers, coastline and the outline of hills.     Draw in the less important features, such as communication lines.     Add appropriate labels and annotations.     Rub out the lightly drawn lines that divided the sketch to start with.

### **Year 7 History: Spring term**

Part 1. Kings & Queens- Who's who?

Henry VII (1485-1509)

#### Henry VIII (1509-1547)

Wives- Catherine of Aragon, Anne Boleyn, Jane Seymour, Anne of Cleves, Katherine Howard, Katherine Parr.

Religion: Catholic then Church of England

#### Edward VI (1547-1553)

Religion: Protestant

Mary I (1553-1558)

Religion: Catholic

Elizabeth I (1558-1603)

Religion: Protestant (but Middle Way)

#### Part 3 key religious beliefs.

#### 1. Catholic

Ruled by the Pope (Head of the Catholic Church). The pope (Papacy) was based in Rome.

Belief in transubstantiation-during communion the bread and wine actually become the body and blood of Christ.

Churches were highly decorated with colourful vestments, stained glass windows, services in Latin. No divorce allowed.

#### 2. Protestant

Set up following Martin Luther's proclamation of revolt against the Catholic Church.

Henry VIII took England out of the Catholic church in 1534. Linked to his desire to divorce Catherine of Aragon.

Monasteries were closed so Henry could sell their land to pay his debts. This stopped poor people from seeking help.

#### Part 2. Main religious changes

Under **Henry VIII** England was a **Catholic** country. This was until he wanted to divorce Catherine of Aragon and marry Anne Boleyn. When the Pope refused to grant a divorce, Henry took England out of the Roman Catholic Church and made himself head of a new **Church** of England.

Edward VI chose to continue the Reformation and make England even more **Protestant**. Churches were whitewashed, stained glass and coloured vestments vanished. The Bible & Prayer Book were now in English.

Mary I changed England back to Catholic. She re-introduced ideas like transubstantiation and the Latin Mass. Under the reign of "Bloody" Mary many Protestants who refused to change religion were branded as heretics and burned to death.

Elizabeth I chose and "Middle Way" and her Religious Settlement confirmed England as a Protestant country but with tolerance for Catholics. Elizabeth's Religious Settlement made her Supreme ruler of the Church of England.

#### Part 4: Threats to the throne

Henry VIII: War with France & Scotland

Edward VI: Rebellions by Catholics over changes to the Prayer Book. Kett's rebellion in protest against changes to land ownership.

Mary I: Wyatt's Rebellion over Mary's plans to marry Philip of Spain.

Elizabeth I: Revolt of the Northern Earls, Ridolfi plot, Throckmorton plot, Babington plot & Attack by the Spanish Armada (1588).

#### Part 5: Spanish Armada

Causes: English pirates attacking Spanish colonies in the New World. Elizabeth sending help to Spain's enemies in Holland. Religion: Catholic Spain versus Protestant England.

Reasons for Spanish defeat: Improved English ship designs. Duke of Palma was late bringing Spanish army to Calais. Weather: storms drove Armada North where it was wrecked off coast of Ireland.

#### **Key words: Tier 2**

Monarch, battle, invasion, economic, religious, government, taxes, describe, account, judgement, conclusion, hypothesis, colony, war, vestments

#### **Key words:Tier 3**

Tudor, Reformation, transubstantiation, divorce, excommunication, Protestant, Catholic, tyrant, monastery, Supreme Governor, empire, Armada, Chronology, Significance, interpretation, causation, evaluate, narrative, explain, analyse, continuity, change,

# **Year 7 ICT Knowledge Organiser – Computer systems**

# A Computer Is a programmable machine which takes in data, processes it and then outputs the result.

Input Device	Bring data from the physical world into the	
	computer system.EG Mouse, touchscreen.	
Output Davica	Bring data from the computer into the	
Output Device	physical world. EG A monitor or speakers.	
Storage Device	Stores data & files on. EG CD, Memory stick.	
Hardware	Is the physical parts or components of a	
	computer	

CPU	Central Processing Unit is used to control and execute		
CFU	commands within the computer.		
Hard drive	Storage which holds documents and programs when the		
natu utive	computer is turned off.		
Motherboard	The main board which connects all components to each other		
RAM	Random Access Memory is volatile and holds open programs		
ROM	Read only memory is non volatile and holds the computers		
	boot up sequence		

#### Spreadsheet

Excel or Google sheets is used to create documents which contain calculations and analyse data.

Function
=SUM(cell:cell)
=AVERAGE(cell:cell)
=MIN(cell:cell)
=MAX(cell:cell)

Cell	A single unit of storage within a spreadsheet program
Cell Reference	The specific location of a cell
Range	A cell reference which links to a group of connected cells (e.g. D2:F6)
Formula	An expression used in a spreadsheet to perform a calculation
Sort	Organises data into order
Filter	Setting conditions so that only certain data is displayed
Search	Look through data to find results that meet certain criteria

Software	This is the set of instructions for the computer to run a particular task or boot up, for example a word processor.
Application Software	Software which is installed onto the computer to perform a specific task such as creating documents or spreadsheets
Operating System	Comes already installed on your computer and is used to control the workings of a computer.
Utilities Software:	These carry out specific tasks which help the computer system run efficiently such as virus checking and Winzip.

# **Maths - Fractions**

Knowledge organiser Year 7

Spring 1 Topic 1:
Fractions

# **Key words**

Numerator Denominator Equivalent Simplify 1) Find the fraction of a given amount

Find 3/5 of 60

- 1) Divide the amount by the denominator  $60 \div 5 = 12$
- 2) Multiply the result by the numerator  $12 \times 3 = 36$

# Calculating with fractions

N8

Adding or subtracting fractions; use a common denominator...

$$\frac{4}{5} - \frac{1}{3} = \frac{12}{15} - \frac{5}{15} = \frac{7}{15}$$

Multiplying fractions; multiply numerators and denominators...

$$\frac{4}{7} \times \frac{2}{3} = \frac{8}{21}$$

Dividing fractions; "flip" the second fraction, then multiply...

$$\frac{2}{7} \div \frac{5}{6} = \frac{2}{7} \times \frac{6}{5} = \frac{12}{35}$$

# **Ordering fractions**

To order fractions, they must first have the same Denominator.

Now we can see that  $\frac{5}{6}$  is bigger than  $\frac{2}{3}$ .

$$\frac{2}{3} = \frac{12}{18}$$
 $\frac{5}{6} = \frac{15}{18}$ 

$$\frac{3}{40} = \frac{1}{4}$$

$$\frac{14}{49} = \frac{2}{7}$$

# **Simplifying**

To simplify fractions we divide the numerator and denominator by the same value.

# **Maths - Perimeter and Area**

# Knowledge organiser Year 7: Spring 1 Topic 2 Perimeter and Area

# **Key Concept**

- •Perimeter the sum of the length of all the shape's sides
- •Area the space enclosed within the perimeter of a shape. It can be found by counting squares or using a formula

# **Examples** 8 cm existing 4 cm 4 cm 4 cm 8 cm 6 cm 4 cm P=4+8+4+8 P = 4 + 8 + 6= 18 cm P = 4 + 2 + 2 + 4 + 2 + 2 + 4 + 8 = 28 cmThe squares are counted to find an area. $A = l \times l$ $A = b \times h$ $A = \frac{1}{2}b \times h$ $A = \frac{(a+b) \times h}{2}$

## **Key Words**

2D

Perimeter

Area

Compound Shape

Length

Square units

# Tip

Perimeter is measured in mm, cm, m

Area is measured in mm<sup>2</sup>, cm<sup>2</sup>, m<sup>2</sup>

# **Maths - Basic Indices**

# Knowledge organiser Year 7: Spring Term 1 Topic 3 Basic Indices

## **Key Concept**

An index number is a number which is raised to a power.

The power, also known as the index, tells you how many times you have to multiply the number by itself.

# **Key Words**

Index

Power

Base

Squared

Cubed

# **Examples**

#### Base and Index

The big number "5" is called the "base"

#### Multiplying indices

To multiply indices, add the powers together:

#### Example

$$2^4 \times 2^2 = (2 \times 2 \times 2 \times 2) \times (2 \times 2)$$

Tip

The word Indices is plural for the word Index

#### Positive Indices

$$a^2 = a \times a$$

$$6^4 = 6 \times 6 \times 6 \times 6$$

$$b^5 = b \times b \times b \times b \times b$$

#### Dividing indices

To divide indices, subtract the powers.

#### Example

$$\begin{aligned} \alpha^1 + \alpha^2 &= \frac{\alpha^4}{\alpha^4} \\ &= \frac{\lambda_0 \times \lambda_0 \times \lambda_0 \times \alpha \times \alpha}{\lambda_0 \times \lambda_0 \times \lambda_0 \times \alpha} \\ &= \alpha \times \alpha \\ &= \alpha^2 \end{aligned}$$

# **Maths - Basic Constructions**

## **Maths - Basic Constructions**

# **Maths - Probability**

# Knowledge Organiser Year 7Spring 2, Topic 1 Probability

#### Key vocabulary:

Impossible - will never happen (0%)

Unlikely - a small chance it will happen (25%)

Evens - same chance to happen or not (50%)

Likely - a good chance it will happen (75%)

Certain - it will definitely happen (100%)

Event - what you do

Outcome - the result of what you do

Relative frequency - probability from past data

Sample space - diagram used to record outcomes of two events

#### Sample space examples

Listing the outcomes when tossing two coins Listing the outcomes when tossing a coin and a dice

		Dice						
		1	2	3	4	5	6

Certain

# Simple probabilities using

Fractions, Decimals or Percentages

P(Picking a yellow) = 1/5 (0.2 or 20%)

P(Picking a blue) = 2/5 (0.4 or 40%)

#### Probability from tables

The table shows the probabilities a spinner will land on numbers 1 to 4

Number	1	2	3	4
Probability	0.1	0.2	0.4	

Hint: The probabilities add up to 1, so P(1) + P(2) + P(3) + P(4) = 1

- a) Find P(4) P(4) = 0.3 because 1 – (0.1 + 0.2 + 0.4) = 0.3
- b) How many times will the spinner land on 1 in 200 trials?
   0.1 × 200 = 20 times

# **Maths - Time and Reading Scales**

### **Maths - Ratio and Scale**

# **Maths - Pythagoras**

# Knowledge organiser Year 7: Spring 2 Topic 4 Pythagoras

# **Key Concept**

In any right angled triangle the square on the hypotenuse is equal to the sum of squares on the two short sides.

# **Examples**

Find the length of the hypotenuse (+ type)

Start with  $c^2 = a^2 + b^2$ 

Sub. in numbers  $c^2 = 12^2 + 5^2$ Calculate  $c^2 = 169$ Square root  $c = \sqrt{169}$ c = 13 Find the length of a short side (- type)

Start with  $c^2 = a^2 + b^2$ 

Sub. in numbers  $15^2 = 9^2 + b^2$ Rearrange  $b^2 = 15^2 - 9^2$ Calculate  $b^2 = 144$ Square root  $b = \sqrt{144}$ 

c = 12

# **Key Words**

Right angled triangle

Hypotenuse

Square

Square root

### Tip

Questions are either

+ type – find the length of the hypotenuse

or

- type – find the length of the short side

All questions end with square root!

### KNOWLEDGE ORGANISER – Year 7 – Introduction to Classical Music

### **Keywords**

Pulse	A steady beat.
Orchestra	A large ensemble (group) of musicians which includes string, wind and percussion instruments.
Canon	The melody is played by lots of
Canon	different instruments, but starting one after the other. A bit like a round e.g. Row, Row, Row Your Boat.
Ensemble	A group of musicians
Major	Music that sounds happy/cheerful
Minor	Music that sounds sad/serious
Forte (f)	Loud
Piano (p)	Quiet
Note	A single pitch
Chord	Two or more notes played at the same time.

### Instrument Families

### **Percussion Family**

The smaller the instrument, the higher in pitch it is. The bigger the instrument, the lower in pitch it is. However, the harp/xylophone/chimes have lots more strings/elements so can play both high pitched and low pitched notes.

Tick when	Recommended Listening - make a list of all the
complete	instruments you hear.

# HOCKEY

Overview of the rules

The rules of hockey are very similar to the rules of football except that players must use sticks instead of their feet to play the ball. There are 11 players on a team made up of a goalkeeper, defenders, midfielders and attackers.

- 1. Use the "front" (flat) side of the stick.
- Cannot use feet.
- At re-starts or free hits, the defending team must stand 5m from the ball.
- Can only score from inside the "D" (A).

# PE - Sport - Basketball

## BASKETBALL

### Rules for Offence

When a player has the basketball (offence) there are certain rules they must follow:

- The player must bounce the ball with one hand while moving both feet. If both hands touch the ball or the player stops dribbling, the player must only move one foot.
- Once a player has stopped dribbling they cannot start another dribble. A player who starts dribbling again is called for doubledribble.
- A player can only start another dribble after another player from either team touches or gains control of the basketball.

### **Defensive Rules**

The team on defence is the team without the basketball.

 The main rule for the defensive player is not to foul. This means the defensive player may not touch the offensive player in a way that causes the offensive player to lose the ball or miss a shot.

### Rules for everyone

- Although the foul rule is described as a defensive rule, it applies exactly the same to all players on the court.
- Basketball players cannot kick the ball or hit it with their fist.
- The positions in basketball are just for basketball strategy and there are no positions in the rules.

### IMPORTANT TECHNIQUES

# **PE - Sport - Badminton**

# **BADMINTON**

### Overview of the rules

Badminton is a net game and played as singles (two opposing players) or doubles (two opposing pairs). The aim of the game is to win points by hitting a shuttlecock across the net and into your opponent's court forcing your opponent to make an error and be unable to return the shuttlecock back.

### The basic rules

- You must serve underarm
- 2. A serve must reach the front service line
- 3. If the shuttle lands on the edge line of the court, this is IN
- If you win a rally, you get a point added to your score and you serve next
- 5. You can only hit the shuttle once in a row
- In a full game, the game is the first player to 21 points

A: Baseline: the end of the court

B: Side line: the side edge of the court

C: The net

D: Centre line: the middle of the court E: Service line: where a rally is started

# PE - Sport - Netball

# NETBALL

### Rules and skills of Netball

- 3 seconds on the ball Players are only allowed to have the ball in possession for 3 seconds.
- Start of a game a game starts with a pass that must be received in the centre third. This is also how a game re-starts.
- 3. Shooting -Players can only shoot form inside the "D".
- Footwork Players cannot more their landing foot (first foot to hit the floor) when they have the ball.
- 5. Contact contact is not allowed in netball
- Penalty pass Awarded for major fouls: Contact and obstruction.
- 7. Distance Defending players must be 0.9m away from the ball before putting up their arms to defend. 2.

The starting positions of the players in netball.

GS = Goal Shooter
GA = Goal Attack
WA = Wing Attack
C = Centre
WD = Wing Defence
GD = Goal Defence
GK = Goal Keeper

## RUGBY

Overview of the general rules

Rugby has may variations but the aim of the game is very simple - use the ball to score more points than the other team.

- 1. Scoring a "try". A try is scored when the ball is placed down on the playing surface with pressure in the in goal area by the attacking team.
- 2. Moving the ball. To move the ball toward the line you can run with it, kick it and pass it. However, passing or knocking the ball forwards (unless kicked) is not allowed.
- 3. Kicking . Kicking is allowed but must kicked from the hands and not while the ball is on the floor.
- 4. Offside. Players are not allowed to receive the ball if they were in front of the ball when it was passed or kicked.
- 5. Penalties. A penalty can be awarded by the referee if any player breaks the laws of the game, this will lead to a turnover of possession. The opposition can choose to tap and run, tap and pass or kick to resume the game.
- 6. Starts and re-starts. If the ball goes out of play the ball is passed back in by the opposition. The ball is kicked from the half way line forward at the start of the match and after each try.

1. Tackling rules:

goal area.

B - Side line

- 2. The tackler must grasp/ wrap the ball carrier below the armpits, on the shirt, shorts or around the legs. The grasp must be simultaneous with, or prior to, shoulder contact.
- 3. The tackler must not shoulder barge their opponent.
- 4. When a tackle is called the player can pass the ball to team mate or present the ball on the ground for a team mate.
- The ball is not allowed to be contested by the opposition.
- TOUCH VERSION use two hands to touch the player at the waist. They then have 2-3 seconds to pass or present the ball.

# **FOOTBALL**

### **IMPORTANT TECHNIQUES**

Overview of the rules

- A football match is played by two teams, with each allowed no more than 11 players on the field (9-a-side at under 12).
- All players must use their feet head or chest to play the ball. Only the goalkeeper is allowed to use their hands, and only within their <u>designated goal area (box A)</u>.
- The aim of the game is to outscore the opposition. A goal (score) is achieved by kicking or heading the ball into the opposition team's goal (B).
- If the ball touches or crosses the <u>side line (C)</u>, it is thrown back in by the team that was not the last to touch the ball.
- The game is controlled by a central referee. They award free kicks and penalties when rules are broken.

# PE - Theory - Part 2

	Phases of a Warm Up (1)				
	Term	Phase	Description		
1	Pulse Raiser	First	Light continuous activity such as slow jogging, is used to increase heart rate and blood flow. Muscles, ligaments and synovial fluid in the joints are warmed, increasing flexibility		
2	Stretching	Second	Stretching the main muscle groups and joints increases their elasticity and mobility so that they are less likely to be strained.		
3	Skills Specific	Third	Sport specific drill performed to focus on muscle groups that come under particular stress in the planned activity.		

	Principles of a Warm Up (2)				
	Principle	Description			
1	Prepare the Body	To gradually prepare the body and mind for physical activity.			
2	Increases Body Temperature	Makes muscles, tendons and ligaments more elastic increasing range of movement and reducing the risk of injury at a joint or in a muscle.			
3	Increase Blood Flow	By increasing the heart rate, blood flow increases resulting in an increase in the oxygen being supplied to muscles.			
4	Injury Prevention	To ensure that muscles are stretched and prepared for physical activity to avoid injuries such as strains.			

	Principles of a Cool Down (3)				
	Principle	Description			
1	Prevent Muscle Soreness	To gradually allow the body and mind for recover from physical activity.			
2	Reduce Body Temperature	Allows muscles to cool down slowly reducing the chance of tightness and muscle ache to set in after activity.			
3	Reduce Heart Rate	Allows the body to slowly return to its resting state.			

	Immediate Effects of Exercise of	on the Body (1)	
	Immediate Effects of Training	Body System	
1	Increase temperature of synovial fluid	The Sheletel Section	
2	Increased flexibility The Skeletal System		
3	Rise in muscle temperature		
4	Increased blood flow to muscles	B. H	
5	Increased flexibility	The Muscular System	
6	Muscle soreness (DOMS)	]	
7	Increased heart rate, cardiac output		
8	Blood diverted to muscles from digestion and other systems (vascular shunting)	The Cardiovascular System	
9	Increase in blood pressure		
10	Increased rate of breathing		
11	Increased rate of gaseous exchange	The Respiratory System	
12	Increased depth of breathing		

### Structure of the muscular system

# **PSHE - Nuisance in the Community & Cycling Safety**

HWCS

Harrow Way PSHE Department - Year 7 - Nuisance in the Community and Cycling Safety

### Define:

### Nuisance

A person or thing causing inconvenience or annoyance.

### Define:

### Anti-Social Behaviour Order

Given out by a court, to stop a person from behaving in certain ways or doing certain things. It's not meant to be a punishment - the idea is to prevent further distress and alarm caused by antisocial behaviour.

### Define:

### **Criminal Damage**

A person who, without lawful excuse, destroys or damages any property belonging to another, intending to destroy or damage any such property, or being reckless as to whether any such property would be destroyed or damaged

### Define:

### Concussion

A mild traumatic brain injury (TBI) can occur after an impact to the head or after whiplash type injury that causes your head and brain to shake quickly back and forth.

# Reasons why people choose not to wear a helmet

- 1. Messes up their hair
- 2. Not cool
- 3. Helmets can be expensive
- 4. Too hot a sweaty
- 5. Never happen to me attitude
- 6 Show off to friends

### Effects of Anti-Social Behaviour

Victims of anti-social behaviour can become frightened of leaving their home and even feel unsafe when in their homes. Not being able to simply walk to the shops and back or walk to their car to go out has a serious impact on the quality of life of individuals.

Anti-social behaviour also has an impact on communities as a whole as it can often lead to the degradation and neglect of areas. The standard of living in an area is negatively affected which destroys the spirit and pride of communities and makes people feel neglected and powerless.

People begin to move from the area and businesses close down. The likelihood of more anti-social behaviour increases and an environment is created where more serious crime can take hold.

# Concussion Concus

Consequences of not wearing a cycle helmet

# **PSHE - Keeping Safe**

### **Harrow Way PSHE Department – Year 7 – Keeping Safe**

### Define:

### **Alcohol**

While some drinks have more alcohol than others, the type of alcohol in all alcoholic drinks is the same –it's a type of alcohol called ethanol. Alcohol is a colourless, odourless and inflammable fluid.

### Define:

### Drug

A medicine or other substance which has a physiological effect when ingested or otherwise introduced into the body.

### Define:

### E-Safety

Strategies and systems to help people stay safe

### Define:

### Smoking

The action or habit of inhaling and exhaling the smoke of tobacco or a drug. Usually through cigarettes or cigars.

	1.5 UNITS		3 UNITS	9 UNITS	30 UNITS
Normal beer half pint (284ml) 4%	Small glass of wine (125m) 12.5%	Strong beer half pint (204ml) 6.5%	Strong beer Large bottle/can (440ml) 6.5%	Bottle of wine (750ml) 12.5%	Biotife of spirits (750ml) 40%
	1	1		consumptio	schrises alcohol in should not y exceed:
Single spirit shot (25ml) 40%	Alcopops bottle (275ml) 5.516	Normal beer Large bottle/can (640ml) 4.5%	Large glass of wine (250m) 12.516	week- f	its per or men omen

### **Prescription Medications**

The law surrounding the selling of or sharing of prescription medications is ambiguous and is often linked to the type of drug/medicine that is being sold.

If the medicine is on the controlled substance list (e.g. morphine, amphetamines and benzodiazepines) then the person supplying can be subject to the punishments which are for that class of drugs.

It is extremely dangerous to share prescription drugs because of the possible side effects and impacts of other medications that are being taken.

### **Effects Of Nicotine**

Nicotine is both a sedative and a stimulant.

When a body is exposed to nicotine, the individual experiences a "kick." This is partly caused by nicotine stimulating the adrenal glands, which results in the release of adrenaline.

This surge of adrenaline stimulates the body. There is an immediate release of glucose, as well as an increase in heart rate, breathing activity, and blood pressure. Indirectly, nicotine causes the release of dopamine in the pleasure and motivation areas of the brain.

Class	Type of drug
Class A	Heroine, Crack Cocaine, Meth, LSD, Ecstasy,
Class B	Cannabis, Speed, Ketamine
Class C	Anabolic Steroids, Khat,
No Class	Alcohol, Tobacco, Cough medicine, Paracetamol, Ibuprofen, Solvents

# Risks from Smoking

# Top 10 Rules for staying safe online

- 1. Don't post any personal information online –like your address, email address or mobile number.
- 2. Think carefully before posting pictures or videos of yourself. Once you've puta picture of yourself online most people can see it and may be able to download it, it's not just yours anymore.
- 3. Keep your privacy settings as high as possible.
- 4. Never give out your passwords.
- 5. Don't befriend people you don't know.
- 6. Don't meet up with people you've met online. Speak to your parent or carer about people suggesting you do.
- 7.Remember that not everyone online is who they say they are
- 8. Think carefully about what you say before you post something online.
- 9. Respect other people's views, even if you don't agree with someone else's views doesn't mean you need to be rude.
- 10. If you see something online that makes you feel uncomfortable, unsafe or worried: leave the website, turn off your computer if you want to and tell a trusted

Spring Term

# The Parable of the Good Samaritan

- Man walking along mugged.
- 2. Priest and a Levite walked past him.
- 3. Samaritan helped him.
- 4. Samaritan belonged to a tribe fighting with the tribe of the injured man.
- 5. JC told this parable to 'love thy neighbour'

Religions which are monotheistic;
<a href="Christianity">Christianity</a>, <a href="Islam">Islam</a> and <a href="Judaism">Judaism</a>. They all believe in the SAME God, Allah, G-d

Sacred; something to do with God/gods therefore should be treated with respect.

Story of Exodus sacred to Jews because...

- 1. G-d rescued Israelites from slavery by the Egyptians.
  - 2. G-d provided a homeland for them.
- 3. G-d parted the Red Sea so they could reach their homeland.

  Jews celebrate this time at Passover with the Seder plate and remember all that G-d did for them.

# **Key Words**

- Monotheistic; belief in 1
   God
  - Attributes of God
- Omnipotent; all powerful
- Omnipresent; everywhere
  - Omniscient; all seeing
  - <u>Omnibenevolent; all</u> loving
    - Transcendent;
       beyond human
       understanding/
       comprehension
  - <u>Immanent</u>; within everyone and everything in the world.
- For Christianity, Islam and Judaism God is all these.

Life

Born to a virgin in

Preached in Israel

Crucified in Jerusalem

Bethlehem

Jewish man

Resurrected

Who is he? Read the boxes, then cover and test yourself to see what you remember.

<u>Teachings</u>	
Parable of the Sheep and Goats Agape 'Love thy neighbour'	

MIRACIES

**Year 7 Knowledge Organizer Spring Term** 

Who is our neighbour?

Everyone, even our enemies.

A miracle is something which breaks the laws of science. An example would be a human being able to fly. Jesus did many miracles.

### **Marriage at Cana**

When JC attended the marriage there was little food so he told the people to continue pouring the water, when it came out of the jug it was wine. Why does this show agape?

all-powerful. Monotheistic Omnipotence theologians regard God as having supreme power. This means God can do what he wants. It means he is not subject to physical limitations like man is. Being omnipotent, God has power over wind, water, gravity, physics, etc. God's power is infinite, or limitless.

Omniscience means all-knowing. God is all all-knowing in the sense that he is aware of the past, present, and future. Nothing takes him by surprise. His knowledge is total. He knows all that there is to know and all that can be known.

**Theist** 

Someone who believes in God

What is the proof? Where would the proof be found?

Someone who doesn't believe in God He is the image of the invisible God, the firstborn of all

**Atheist** 

creation. 16 For by him all things were created, in heaven and on earth, visible and invisible, whether thrones or dominions or rulers or authorities—all things were created through him and for him. 17 And he is before all things, and in him all things hold together.

The 16<sup>th</sup> century reformation is the most important event in British history and affects us even today.

- 1. There was one church (Catholic Church) and everybody in Europe belonged to it.
- Henry VIII wanted a divorce from his first wife so he could marry Anne Boleyn. The Carbolic Church doesn't allow divorce.
- 1. In Germany Martin Luther was speaking out against the Catholic Church as it made money selling 'passes' for people to get into heaven.
- Luther read the Bible and discovered there were practises which the Catholic Church used which had no scriptural basis .
- 1. Henry decided to make himself the Head of the Church in England rather than the Pope thereby 'splitting' from Europe and the Catholic Church.
- 1. Some countries formed their own church (The Protestant Church) because they protested against the corruption of the Catholic Church.

# Science - Biology - Breathing and Respiration

### **Systems – Breathing and respiration**

Sec	Section 1 Definitions		
1	Alveoli	Tiny air sacs in the lungs where gas is exchanged during breathing	
2	Bronchi	Tubes (2) that take air from the trachea to each lungs	
3	Bronchioles	Small branches from the bronchi that distribute air to the air sacs (alveoli)	
4	Diaphragm	Sheet of muscle below the lungs that contracts and relaxes to allow the lungs to expand or decrease in volume	
5	Lungs	Organ in thorax(chest) where gas exchange happens	
6	Trachea	Windpipe – takes air from the mouth/nose to the lungs	
7	Respiration	Process in living things in which oxygen is used to release energy from food (glucose = sugar)  Glucose + oxygen → carbon dioxide + water + energy	
8	Mitochondria	Organelles in the cytoplasm of all cells where aerobic respiration takes place	
9	Aerobic respiration	Respiration that requires oxygen. Occurs in all living organisms	
10	Anaerobic respiration	Respiration without oxygen (produces less energy)  Glucose→ lactic acid	
11	Fermentation	Anaerobic respiration in plants and fungi.  Glucose → ethanol + carbon dioxide	
12	Circulatory system	Consists of the heart, blood vessels and blood. It function is to transport substances eg oxygen / food around the body	

### Section 3 Breathing

How does each	Inhaling	Exhaling (expiration)
listed feature	(inspiration)	breathing out
change or act?	Breathing in	
The diaphragm	Contracts / moves	Relaxes /moves up
	down	
Intercostal muscles	Contract – move the	Relax – ribs move
(rib muscle)	ribs up and out	down and in
Volume of chest	increase	decreases
cavity		
Pressure in chest	decreases – air	increases – pushes air
cavity	moves in	out

### Section 4 Gas exchange

The Alveoli are adapted for gas exchange in the lungs. They have:

- 1. A large surface area
- 2. Thin cell walls
- 3. Surrounded by lots of blood capillaries

Oxygen diffuses from the air in the alveoli into the blood Carbon dioxide diffuses from the blood into the air in the alveoli

### **Section 5 Aerobic respiration**

### Aerobic Respiration

Respiration is a series of reactions that takes place in the cells of animals and plants.

Energy is released in the reaction. The mitochondria, found in the cell cytoplasm, is where respiration happens.

Glucose + Oxygen → Carbon Dioxide + Water (+energy)

 $C_0H_{12}O_0 + 6O_2 \rightarrow 6CO_2 + 6H_2O_1$ 

'Energy' is in brackets because it is not a substance. This type of respiration, where oxygen is used, is known as aerobic respiration. Oxygen (from breathing) is carried from the lungs to all the cells of the body in the blood. The waste products (carbon dioxide and water) are taken away from the cells by the blood and breathed out from the lungs.

# **Science - Chemistry - Acids & Alkalis**

Section 1. Acid and Alkali	Definitions
1. Acid	Substance with a pH value less than 7 contains H <sup>+</sup> ions
2. Alkali	Soluble base, pH value greater than 7 contains OH <sup>-</sup> ions
3. Base	Substance with a pH value greater than 7
4. Soluble	Will dissolve in water
5. Neutral	Substance with a pH value of 7
Section 2. Indicators	Definitions
6. Indicator	Substance that changes colour to identify an acid or alkali
7. Litmus paper	Red litmus goes blue in an alkali, Blue Litmus goes red in an acid
8. Universal Indicator	Green liquid form shows full scale of pH values from 0 to 14
9. pH probe	Digital reading removes human error to improve accuracy

Section 3. Neutralisation	Definitions
10. Neutralisation	When an acid and alkali mix together to make neutral substance with pH 7. It is an exothermic reaction
11. Titration	An accurate method to carry out neutralisation
12. M.A.S.H	Metal + Acid > Salt + Hydrogen
13. Gas test for hydrogen	A lit splint goes pop
14. Making soluble salts	Metal Oxide + Acid > Salt + Water

Section 4. Working Scientifically	Definitions
15. Evaluate	Compare advantages and disadvantages make a decision
16. Accuracy	How close the measurement is to the true value
17. Resolution	Size of the interval of measurement e.g. 0.5 ml or 1 ml
18. Precision	Getting the same measurement each time
19. Anomalies	"Outliers" unexpected results often due to human error

Acid	Name of salt	Example
Hydrochloric (HCl)	Chloride	Magnesium Chloride
Sulfuric (H <sub>2</sub> SO <sub>4</sub> )	Sulfate	Copper Sulfate
Nitric (HNO <sub>3</sub> )	Nitrate	Potassium Nitrate

# **Science - Physics - Space**

# **Space**

Section 1	The Night sky
Galaxy	A galaxy is a collection of millions or billions stars, gas and dust; our galaxy is the Milky Way.
Stars	A <b>star</b> is a very large ball of bright glowing hot matter in space. That matter is called plasma. Stars are held together by gravity.
Planets	Planets are round and made up of rocks and gas large enough to hold itself together by gravity. They orbit a star.
Meteors	Small balls of dust or rock that burn up in the earth's atmosphere producing streaks of light. Meteorites are their remains when/if they reach earth.
Comets	Balls of ice and rock with a fuzzy haze.

Section 3	The Earth and Seasons
Axis	The earth spins on its axis, tilted at 23 degrees, it takes 24 hours to rotate fully (one day)
Day and night	The spin of the axis gives us day and night, day when the earth faces the sun, night when you face away.
Year	The earth orbits around the sun once every 365 days, a year.
Seasons	The tilt of the axis gives us seasons. Summer is when a hemisphere tilts towards the sun and winter when it tilts away. Its hotter in the summer as the rays are more concentrated on the earth compared to the winter

### The Solar System

There are eight planets in our solar system, which orbit the Sun in an ellipse shape.

The asteroid belt is between Mars and Jupiter. It contains thousands of pieces of rock.

Section 4	The Moon
Phases of the moon	The moon looks different each night as it is orbiting the earth. The moon only reflects the sun's light it doesn't produce its own light
Lunar eclipse	The light from the sun can be blocked when the earth comes between the sun and the moon.
Solar eclipse	When the moon comes between the sun and the earth, sunlight cannot reach parts of the earth's surface.

# Estrategia 4

### **Mnemonics**

One way of remembering new words is to invent a mnemonic: a rhyme or saying that sticks easily in the mind. Here's an example from the word list above, but it's best to make up your own – you'll find them easier to remember/harder to forget.

Others

You can't learn every word like this – it would take ages! But it's a great way of learning those words that just don't seem to stick.
